WERKSITZ

Health protection and higher performance through ergonomic workplace swivel chairs

For over 30 years, our products are well known for healthy seating and standing at the workplace. To ensure the outstanding quality which you have a right to expect from us, we develop all components in-house and manufacture them with utmost care.

As a medium-sized company, we can flexibly respond to your individual requirements and requests in the laboratory, clean and wet room. And if something is not available, we invent it for you – in line with our maxim: „Impossible don't exist!“

Stefan Milewski

WERKSITZ – The proper model for everyone

Those who sit well, work better – and good and healthy seating starts with ergonomic Werksitz products. Our **modular chair portfolio (page 16)** convinces in laboratories, clean and wet rooms with disinfected, easy to clean surfaces, sophisticated technology and ergonomics for fatigue-free, relaxed working. The best example for this is the in-house developed asynchronous mechanical seat support system to independently adjust seat and backrest tilting angle; or, in addition, ergonomically designed operating elements, such as the backrest bracket of the **KLIMASTAR model (p. 10-11)**.

WERKSITZ – Quality from A to Z

For us, quality does not end with long-living products: Our goal is to support you perfectly with our services – from consulting over design, material selection and manufacture up to customer service.

DIN EN ISO 9001 certification and the GS mark can be taken for granted as well as the fulfilment of all safety and quality standards prescribed by DIN 68 877 and the German Workplace Order § 25. Werksitz quality means for you: **Our products meet your requirements optimally, today and in the future.**

WERKSITZ – Materials for laboratory needs

The material combinations of our laboratory chairs such as stainless steel and closed-cell polyurethane or clean-room suitable imitation leather meet the highest function and cleanliness requirements in laboratories or clean rooms. They are easy to clean and hard-wearing – and can be disinfected if required

Made in Germany

WERKSITZ – Quality that can be tested and measured

During manufacture, we attach greatest importance to the high quality of our materials. This is why we can offer our 5 year WERKSITZ warranty, if the products are used in a careful and appropriate manner.

The 10 year spare part replacement guarantee ensures the sustainable availability of spare parts to you.

The comfort-revolution

Viscoelastic PU upholstery make sure that you sit comfortably and well-tempered. The body temperature heats up the material, increasing its elasticity.

Environmentally aware and innovativ

These are no contradictions for us; we attribute importance to sustainability and the conscious use of environment-friendly production methods and materials.

Test us and order a sample model to your choice for two weeks free of charge!

*„Robust and hygienic –
my first choice!“*

Swivel chairs for clean rooms

The combination of materials, for example chrome and imitation leather meets the highest standards required for clean rooms in terms of functionality and cleanliness. These chairs are easy to clean, hard-wearing and can be disinfected, if required.

- Certified for Class S clean room as per DIN EN ISO 14644-1
- All materials washable and disinfectant-friendly; imitation leather cushion is DIN 53160 compliant and urine, sweat and blood resistant.

WS 1720 RR ESD

As versatile as your needs

The WERKSITZ-modular system

Our special modular system provides almost unlimited options; all components are screwed on and plugged in.

This ensures that all chair elements are easy to replace. You can therefore create your own individual chair, which can be supplemented by a wide range of additional accessories.

- Individual design and equipment
- Simple assembly
- Robust design
- Top quality
- Long lifetime
